

GUIDELINES FOR ARTICLE COMPETITION ON NEP 2020

The National Education Policy (NEP) 2020 is a comprehensive framework introduced by the Indian government to revamp the country's education system. It aims to make learning more holistic, flexible, and aligned with the needs of the 21st century, focusing on critical thinking and creativity rather than rote memorization. The policy covers all levels of education, from early childhood to higher education, and seeks to provide equal opportunities for all students, enhance teacher training, and integrate technology into learning. By addressing these areas, NEP 2020 aspires to transform India into a global knowledge hub.

Manthan for Academia, renowned for its commitment to educational enrichment and reform, recently hosted a transformative event "The NEP Manthan Symposium," in Nagpur that garnered significant acclaim and participation. Through expert-led sessions, interactive panels, and robust discussions, participants gained invaluable insights into NEP 2020's implications for teaching practices and educational reform. The symposium not only addressed participants' queries comprehensively but also provided them with certificates, affirming their commitment to advancing educational excellence aligned with NEP 2020's transformative goals. Manthan for Academia's initiative underscores its pivotal role in fostering informed dialogue and empowering educators to drive positive change in India's educational landscape.

The article competition on NEP is being held to foster awareness, understanding, and to gather interpretations and recommendations about NEP 2020, which can be presented to the government for consideration. The competition aims to engage lecturers, professors, teachers, research scholars, and academic professionals from recognized institutions across India.

Competition Details
